

DR. LILI REN

BIOSKETCH

Dr. Lili Ren is the deputy director of Christophe Mérioux Laboratory, professor at the Institute of Pathogen Biology, Chinese Academy of Medical Sciences & Peking Union Medical College. Her major is in etiology, pathogenesis and interaction of pathogen and host of respiratory viruses. During the outbreak of COVID-19, she and her colleagues were involved intensively in the identification of SARS-CoV-2 and were the first to report the cold-chain food contamination could be the possible origin of COVID-19 resurgence.
